LIMKOKWING UNIVERSITY OF CREATIVE TECHNOLOGY

Faculty of Information & Communication Technology

SOFTWARE TESTING & RELIABILTY BIST4110

Department	:	Faculty of Information & Communication Technology
Course Name	:	Software Testing & Reliability
Semester	:	1
Commence Date	:	**13th October 2026**
Deadline Date	:	**6th November 2026**
Unit Controller / Examiner	:	Mr. Makheka
Contact Number	:	Limkokwing/Ext 45
E-mail	:	assignluct@gmail.com

Group Project 20%

Develop an application of your choice that runs on **Linux using C/C++ (Let me know first the application you are going to develop)**. SLOC for your application **must** be more than **4000** and test your application. You are required to produce a report on the test that you took on the application and produce a bug report. You are encouraged to apply 99% of the testing techniques and tools (7 tools) you learned in this course. And you will be required to state testing strategy you used and why. Your Report should include the following, but also you can include anything that you will find relevant during this project.

- Abstract **1 paragraph**
- Introduction **3 Paragraphs**
- "Body" Literature Review & Background Research, System Architecture (Class Diagram, EER Diagrams, etc), Test Plan, Test Cases, Test Execution Report, Bug Reports, Performance and Security Reports - **20 to 30 pages**
- Conclusion **3 paragraphs**
- Reference **at least 30**
- **NB: Please include table of contents, page numbers (1 of 3), line spacing 1.5, font size 12, Arial Narrow**

OBJECTIVE

- The objective of the group assignment is for students to understand software testing and apply it.

EXPECTED OUTCOME

- Students are expected to show clear knowledge of testing as applied in software engineering.
- Understand and apply software testing tools

SUBMISSION INFORMATION

- Print out the Assignment by using Arial Narrow font style and size of 12 by using any word processing software you know. Line spacing should be 1.5
- **Your report should be between 20 - 40 pages excluding reference, table of contents and your code as appendix. Your references must be more than 30. 80% of your references should be from journals and books. For journals, they must be THREE (3) years old. Please include an installation guide / manual for your application**
- Your report should follow IEEE style of referencing.
- **PLEASE UPLOAD YOUR REPORT ON TURNITIN BEFORE PRINTING AND SIMILARITY MUST BE LESS THAN 15%**
- **PLEASE submit a hardcopy of your assignment cover page stapled together as submission on or before 11:59am 6th November 2026.**
- You submit a softcopy to assignluct@gmail.com in LATEX.
- **This project is a group work and it contributes 20% to your total marks. A group must have 5 to 6 members per group.**
- Dates are subjected to change, so you are encouraged to start the project as early as you can.
- E&OE

MARKING CRITERIA

The following is the marks deduction:

- Late submission = 10% per day of your total marks irrespective of reasons and excuses
- Improper indentation = -2 points is awarded if there's more than 3 lines of improper indentation.
- Not following question requirements = 0 % is awarded immediately.
- Plagiarism = 0% is awarded immediately.
- Reference less than 25= 0% is awarded immediately.
- Let others copy your work = 0% is awarded immediately.
- Off topic work = 0% is awarded immediately.
- Application Development= 10% of 20%.
- Report = 10% of 15%. However, 0% if you got 0% in Application Development.

Marks Allocation

CONTENTS	MARKS	MARKS AWARDED
1. Abstract	4	
2. Introduction	6	
3. Body	**25**	
4. Conclusion	5	
5. Layout of the report (IEEE Format)	5	
6. Written English	5	
7. Application	**40**	
8. Presentation Content Understanding Speaking skills Visual Aids (slides) Team Collaboration Time Management	**10** 2 2 2 2 2	
Total	100	

"Passion For Testing, Passion For Quality"
